

2025 Thornton Water Rates

Like many cities across the country, Thornton continues to see increases in the cost of maintaining, expanding, and improving our water system. To continue providing our community with clean, reliable drinking water, Thornton City Council has approved a water rate increase for all customers, effective **January 1, 2025**.

How will the changes affect my monthly bill?

The table below shows the water bills of a typical Thornton single-family residential water user on a 7,000-square-foot lot. Calculations are based on typical monthly water use of 4,250 gallons in winter and 12,000 gallons in summer. Individual bills are determined based on actual monthly usage.

Customer Type	Typical Winter Bill		Typical Summer Bill	
	Today	Starting 1/1/25	Today	Starting 1/1/25
Inside City Residential Customer	\$34.10	\$37.88	\$84.50	\$93.88

Factors That Influence Water Rates

- Inflation
- PFAS mitigation
- Water system maintenance
- Infrastructure investments
